

Eleventh International Soil Congress on "Challenge Soil Threats Save Your Future Horizon"

Join us in Cappadocia, TÜRKİYE from September 23-25, 2024.

***New deadline for abstract submissions: July 15, 2024!**

We are excited to announce the International Symposium on "Challenge Soil Threats Save Your Future Horizon" (SOILSAFE 2024) jointly organized by the Soil Science Society-Turkey, Potato Research Institute-Ministry of Agriculture and Forestry and Nevşehir Hacı Bektaş Veli University. This significant event will take place in Cappadocia, Türkiye and promises to be a milestone in soil science.

SOILSAFE24 will act as an international platform for key stakeholders – including policymakers, researchers, and practitioners – to discuss and advance different fields of soil science. In an era marked by challenges such as food scarcity, climate change, and unsustainable soil practices, the symposium will underscore the critical need for the protection and sustainable management of soil sources.

The symposium aims to create a unique ground by bringing broad groups of senior scientists, academicians, experts, policy makers, young researchers and students from different national and international institutions to analyze the current and the future trends of soil and land resources; establish new policies based on the principles of land degradation neutrality and finally create a universal message for the sustainable use of world soil resources.

Learn more about the symposium's goals, themes, and other details on the official Symposium <https://soilcongress.org/>
